Time limited Internet and computer access

# G DATA Total Security

- **Browser Cleaner**  
Blocks or removes annoying add-on programs and toolbars
- **Password Manager**  
Safely manage or generate passwords
- **Backup**  
Password-protected back-ups with Cloud support
- **Tuner / Encryption**  
Optimizes your system / encrypted data safe on your PC
- **Device Control**  
Enable / Disable usage of USB sticks, webcams, etc.

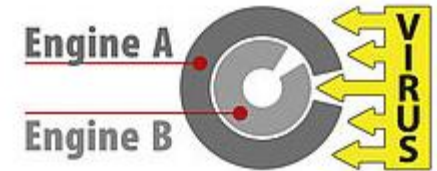

# G DATA Security Features

- The following security features are included within **all** versions of our B2C products:
  - G DATA CloseGap Security
  - G DATA Anti-Ransomware Protection
  - G DATA Keyboard Guard
  - G DATA Bank Guard
  - G DATA Exploit Protection

# G DATA CloseGap

- Dual engine technology functionality

A dual engine provides perfect protection against online threats. However, the double detection uses up a lot of computing resources.

- G DATA CloseGap functionality

G DATA CloseGap active hybrid protection detects and closes holes in the protective shield fully automatically. It does so quickly and effectively – for comprehensive, efficient protection that does not slow down your PC or laptop.

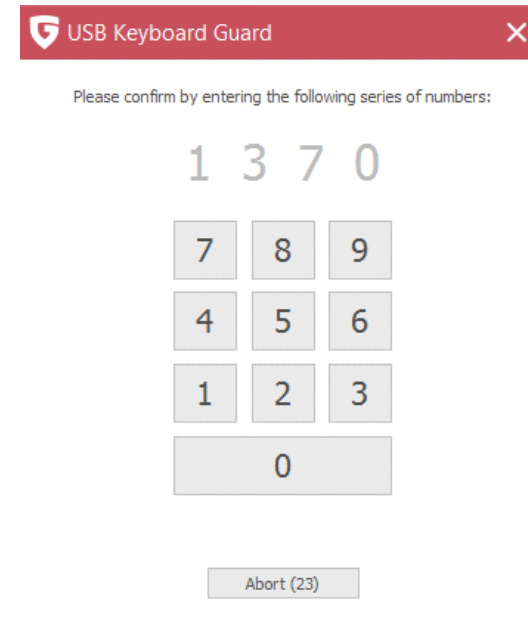

# G DATA Keyboard Guard

- USB Keyboard Guard

In order to place malware on your computer, cyber criminals camouflage USB sticks as keyboards. The G DATA Keyboard Guard detects those devices in disguise and warns you immediately.

# G DATA BankGuard / Exploit Protection

- USB BankGuard

Make your banking transactions and online shopping safe - with our patented BankGuard technology. Efficient protection against man-in-the-middle attacks on online banking websites.

- USB Exploit Protection

Vulnerabilities often appear where nobody expects them, including programs you use every day. With our exploit protection you prevent hackers from exploiting these vulnerabilities.
